Benjamin Cohen

Senior Frontend Engineer

(516) 668-3981 bac1087@gmail.com

New York, NY · open to relocation

thealoofbuddha.dev linkedin.com/in/aloofbuddha github.com/AloofBuddha

Design-oriented senior frontend engineer who owns the frontend end-to-end, with a decade shipping React and TypeScript products across fintech, healthcare, and ed-tech, from **company-wide design systems** to high-traffic conversion funnels. Currently building **AI governance tooling** at LangChain: enterprise controls that let regulated teams adopt LLM agents safely. Also **four years teaching full-stack development** and mentoring **hundreds of engineers** now at top tech companies.

EXPERIENCE

LangChain — Jun 2026 – Present

Senior Software Engineer (AI Governance)

- Frontend/design engineer on LangChain's AI Governance tooling — enterprise controls for adopting LLM agents safely in regulated environments.
- Build spend-policy enforcement, secrets redaction, and PII obfuscation workflows so regulated customer data (HIPAA and similar) never reaches third-party model providers.
- Build attribute- and role-based access control (ABAC/RBAC) permissions for fine-grained governance of agents, models, and data across enterprise workspaces.

`React · TypeScript · Python`

SoFi — Dec 2023 – Apr 2026

Senior Software Engineer

- Co-led rollout of SoFi's unified design system, building reusable React components adopted company-wide.
- Redesigned the Student Loan Refinancing funnel using the new design system; partnered with backend teams to migrate the API layer from REST to GraphQL.
- Designed and implemented A/B experiments improving conversion by ~3% resulting in a **$12M monthly revenue lift**.

`React · TypeScript · GraphQL · Optimizely`

Code Platoon — Oct 2022 – Oct 2023

Lead Software Instructor

- Taught modern full-stack development at a not-for-profit helping military veterans transition to software careers.
- Rewrote our assessments and built an automated GitHub Actions pipeline for instant feedback and CI/CD grading, reducing assessment turnaround from days to seconds.

`React · JavaScript · GitHub Actions · Python · Django`

DUOS — Nov 2021 – Oct 2022

Senior Software Engineer

- Owned all frontend surfaces (marketing, internal ops, and consumer mobile) for DUOS's senior-care platform.
- Built robust automated testing (unit, integration, e2e) integrated with CI/CD to ensure rapid, stable releases.

`React · React Native · TypeScript · MUI · Jest · Cypress`

ServiceMaster May 2019 – Oct 2021

Frontend Developer III

- Delivered full redesign of flagship brand sites and checkout flow for **millions of annual users**, introducing Jest and Cypress coverage to ensure stability through the migration.

`Ember.js · React · Jest · Cypress`

Fullstack Academy Jul 2016 – Apr 2019

Software Instructor

- Instructor at one of the first major coding bootcamps, delivering full-stack lectures and leading curriculum migration from Angular 1.x to React (acquired 2019).
- Mentored **hundreds of engineers** now at top tech companies.

`Angular 1.x · React · Node.js · Express · PostgreSQL`

Microsoft Aug 2014 – Jul 2016

Software Development Engineer

- Developed internal UI tools enabling support engineers to train early AI models (Cortana) on Windows and Office troubleshooting flows.

`Angular 1.x · C# · ASP.NET`

PROJECTS

CollabCanvas Live Site · GitHub · Demo

Real-time collaborative whiteboard with AI-powered natural language commands ('create 10 red circles, align vertically') via LLM tool calling with canvas context awareness. Built to explore AI-native interaction patterns — learning firsthand where LLMs excel and where they struggle.

`React · TypeScript · Konva · xAI API · Yjs · PartyKit · Cloudflare`

Fraction Dojo Live Site · GitHub

Karate-themed **math tutor** teaching fraction equivalence (½ = 2/4 = 4/8): chop, glue, and simplify a wooden board to make abstract notation tangible, guided belt-by-belt by an animated sensei. Built in a week as a Synthesis Tutor clone, with a framework-agnostic core so game logic can port to React Native.

`React 19 · TypeScript · Vite · Tailwind v4 · shadcn/ui · Zustand · Vitest`

EDUCATION

Johns Hopkins University · B.S. Computer Science · GPA 3.7 / 4.0 · Upsilon Pi Epsilon
