

Benjamin Cohen

Senior Frontend Engineer

📞 (516) 668-3981 ✉️ bac1087@gmail.com

📍 New York, NY · open to relocation

🌐 [linkedin.com/in/alooofbuddha](https://www.linkedin.com/in/alooofbuddha) 🐙 github.com/AloofBuddha

Design-oriented senior engineer who owns the frontend end-to-end (React, TypeScript, GraphQL, testing, CI/CD) and partners closely with product and design to ship polished, delightful, high-conversion experiences. Strong foundation in teaching developers, building design systems, and architecting complex UIs. Passionate about exploring how **AI-native interfaces** can make powerful tools more intuitive and accessible - especially for developers.

EXPERIENCE

SoFi

Dec 2023 – Jul 2025

Senior Software Engineer

- Co-led rollout of SoFi's unified design system, building reusable React components adopted by **6+ product teams**.
- Redesigned the Student Loan Refinancing funnel with said design system and partnered with backend teams to transition API layer from REST to GraphQL.
- Designed and implemented A/B experiments improving conversion by ~3% resulting in a **\$12M monthly revenue lift**.

React · TypeScript · GraphQL · Optimizely

Code Platoon

Oct 2022 – Oct 2023

Lead Software Instructor

- Taught modern full-stack development at a not-for-profit helping military veterans transition to software careers.
- Rewrote our assessments and built an automated GitHub Actions pipeline for instant feedback and CI/CD grading, reducing assessment turnaround **from days to seconds**.

React · JavaScript · GitHub Actions · Python · Django

DUOS

Nov 2021 – Oct 2022

Senior Software Engineer

- Owned all frontend surfaces (marketing, internal ops, and consumer mobile) for DUOS's senior-care platform.
- Built robust automated testing (unit, integration, e2e) integrated with CI/CD to ensure rapid, stable releases.

React · React Native · TypeScript · MUI · Jest · Cypress

ServiceMaster

May 2019 – Oct 2021

Frontend Developer III

- Delivered full redesign of flagship brand sites and checkout flow, modernizing UX for millions of annual users
- Introduced automated test coverage (Jest, Cypress) that ensure feature parity and minimize regressions as we transitioned to the new site architecture.

Ember.js · React · Jest · Cypress

 Fullstack Academy

Jul 2016 – Apr 2019

Software Instructor

- Early engineer/instructor at one of the first major coding bootcamps (successfully acquired in 2019).
- Delivered lectures on full-stack development and led curriculum migration from Angular 1.x to React.
- **Mentored hundreds of engineers** now at top tech companies

Angular 1.x · React · Node.js · Express · PostgreSQL

 Microsoft

Aug 2014 – Jul 2016

Software Development Engineer

- Developed internal UI tools enabling support engineers to train early AI models (Cortana) on Windows and Office troubleshooting flows.

Angular 1.x · C# · ASP.NET

 Johns Hopkins University

Jun 2013 – Aug 2013

Research Assistant

- Contributed to the design of a statically-typed functional scripting language ("Big Bang") with full type inference in Haskell.

Haskell · C++

 National Science Foundation

Jun 2012 – Aug 2012

Research Assistant

- Built NLP classifier for hotel review fraud detection, improving model accuracy from 89% → 94% using NLTK and scikit-learn.

Python · NLTK · scikit-learn

HIGHLIGHTED PROJECT

CollabCanvas

[Live Site](#) · [GitHub](#) · [Demo](#)

Real-time collaborative whiteboard with **AI-powered natural language commands**. Users can manipulate canvas elements through conversational prompts ('create 10 red circles, align vertically with 10px gaps') leveraging GPT-4 with custom RAG for canvas context awareness. Supports batch operations and high-level UI generation. Built to explore AI-native interaction patterns—learning firsthand where LLMs excel (structured commands) vs. struggle (complex spatial reasoning, layering specifically). React + Firebase + OpenAI API.

React · Firebase · TypeScript · Konva · Zustand · OpenAI API

SKILLS

React / Next.js

TypeScript

GraphQL

Jest / Cypress

Product UI / UX

Teaching / Mentorship

Performance & Architecture

AI-Driven UX / Experimentation

EDUCATION

Johns Hopkins University — B.S. Computer Science · GPA 3.7 / 4.0 · Upsilon Pi Epsilon
